A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 December 2006 has been entered.

Claim 84 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schulz *et al.* (US 5,480,734) in view of Bunyea (US 4,871,629) and Mita (US 5,456,994), for reasons of record.

Claims 59-83 are allowed. The prior art does not disclose a battery pack having a mechanism that dissipates heat therefrom works to maintain a desired temperature for optimizing the performance of a cordless power tool used therewith. Such optimization is disclosed, for example, in the specification on page 2, lines 1-2 and page 5, lines 19-24.

Applicant's arguments filed 14 December 2006 have been fully considered but they are not persuasive.

Applicants argue that in view of the amendments filed 14 December 2006, all claims are in condition for allowance. However, no amendment has been made to claim 84. Thus, the previous rejection is maintained.
